

WHAT ARE WIFI CALLS?

WiFi Calling, also known as Voice over WiFi (VoWiFi), is a technology that allows users to make voice calls over the WiFi network in their home, office, or other location with WiFi coverage.

This means that instead of using the traditional mobile network, calls are made through the WiFi internet connection.

The main advantages of WiFi Calling are:

Improved coverage: WiFi Calling is especially useful in areas with poor mobile coverage or where mobile calls are expensive. The WiFi connection offers better coverage and call quality.

Greater convenience: WiFi Calling allows calls to be made in places where mobile signal is weak or non-existent, which can be very useful for travelers or those who work in buildings with poor signal reception.

In terms of costs, operators offer WiFi Calling for free in their mobile phone plans. In Spain, the main operators that offer WiFi Calling are Movistar, Orange, and O2 (Movistar's low-cost brand).

If your company is foreign, you should check whether it allows you to make WiFi calls. Additional roaming charges may apply from your operator. Therefore, it is recommended to check with your operator before traveling abroad whether your mobile phone plans include international WiFi calls and what the associated costs are.

How to activate wifi calls?

The following are general steps to activate WiFi Calling on different phones in Spain:

iPhone:

Make sure your phone is updated to the latest version of iOS. Go to Settings > Phone > WiFi Calling and enable the option. A message will appear asking if you want to activate WiFi Calling, confirm the action.

Samsung:

Make sure your phone is updated to the latest version of Android.

Go to Settings > Connections > Calls > WiFi Calling and enable the option.

A message will appear asking if you want to activate WiFi Calling, confirm the action.

Huawei:

Make sure your phone is updated to the latest version of EMUI.

Go to Settings > Device > Calls > WiFi Calling and enable the option.

A message will appear asking if you want to activate WiFi Calling, confirm the action.

Xiaomi

Make sure your Xiaomi device is updated to the latest version of MIUI (Xiaomi's Android-based customization layer).

Go to "Settings" on your Xiaomi device.

Scroll down and select "Phone Calls".

Select "WiFi Calling".

Enable the "Allow WiFi Calling" option.

Wait for the setup process to complete and your Xiaomi device will be ready to make WiFi calls.

It is important to note that not all phones are compatible with WiFi Calling, even if the aforementioned operators are used. Therefore, it is important to check with the operator if your phone is compatible before attempting to activate this function.
