SEWAGE WELL DISINSECTITATION SERVICE

July 2018

1.- INTRODUCTION

The past third and fifth of July proceeded to carry out a disinsectitation treatment of the sewage wells of the Residential Complex. The first day the team formed by two workers, a van and an spray equipment made the Naranjos Boulevard, Jardines Boulevard, Al Kassar shopping center road, Albahaca street and streets that cross gardens from one to thirteen.

The second day took place the Naranjos of Carrascoy street, streets that cross from Jardines Naranjos from one to eight, Villas Jana and La Isla.

Disinsectitation team

2.- RESULTS

The results obtained are broken down in the following tables

NARANJOS		NARANJOS	
Naranjos boulevard	Presence	Naranjos of Carrascoy street	Presence
Opposite garden 1	NO	Opposite garden 1	NO
Opposite garden 2	NO	Opposite garden 2	NO
Opposite garden 3	NO	Opposite garden 3	NO
Opposite garden 4	NO	Opposite garden 4	NO
Opposite garden 5	NO	Opposite garden 5	NO
Opposite garden 6	NO	Opposite garden 6	NO
Opposite garden 7	NO	Opposite garden 7	YES
Opposite garden 8	NO	Opposite garden 8	YES

The presence detected ranges from eight to ten units.

NARANJOS		LA ISLA	
Street	Presence	La isla	Presence

AL KASSAR SHOPPING CENTER	
Street/Avenue	Presence
Al Kassar road	NO
Al Kassar Parking	NO

3.- CONCLUSIONS

Given the results, we can conclude that the presence of insects (cockroaches) in the sewage wells of the Residential Complex is merely anecdotal. In no case does it pose a threat to the well-being of owners.
