SUMMARY

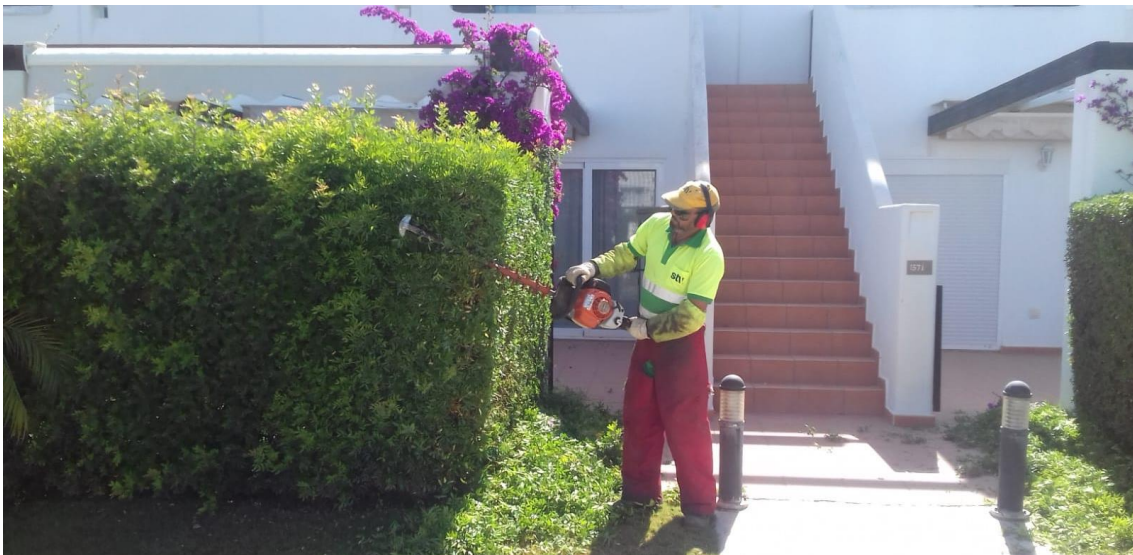

During this week, lawn mowing has been carried out in Naranjos 5, 6, 7, 8, as well as in La Isla, Jardín 1, 2, on inner road and on inner landscapes, while in Jardín 3 it has not been possible to finish this week.

On the other hand, this week the hedge trimming has been carried out in Jardín 12, 13, as well as in Jardín 1.

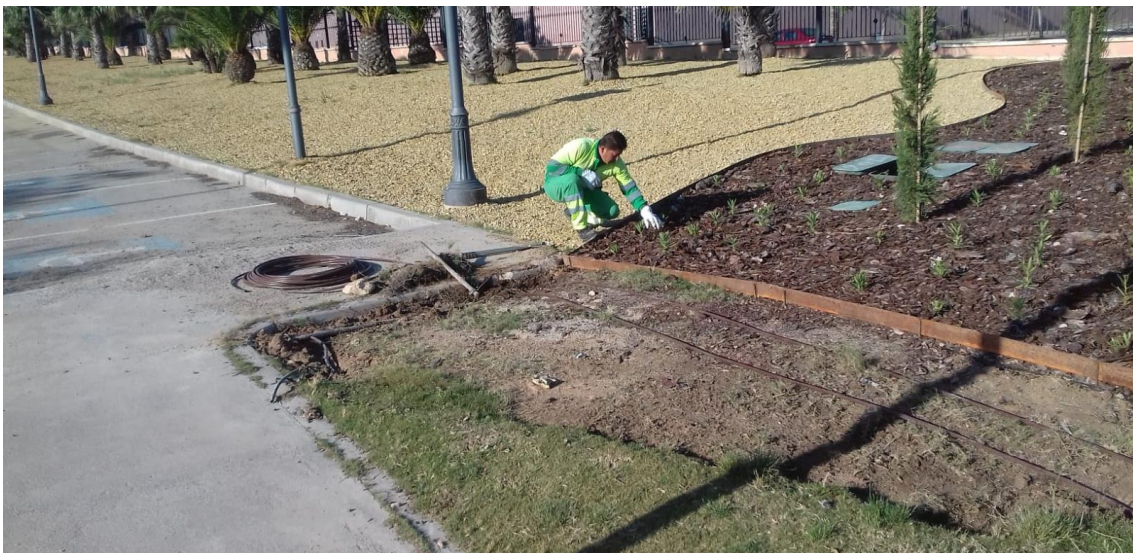

Regarding phytosanitary treatments, the treatment against red palm weevil has been continued, the treatment against mosquito has been carried out on La Isla lake, and a fungicidal treatment has also been carried out on the cypresses of the new landscaping. In addition, an insecticidal treatment has been carried out on geraniums.

Also routine maintenance of swimming pools has been carried out, irrigation system reviews have been carried out and gauras trimming in access road have been carried out.

Likewise, the maintenance of the Municipal Park has been carried out, eliminating weeds.

It should be noted that the state of the lawn and the state of the irrigation system has been reviewed in the central reservation of Naranjos road. Likewise, lawn has been transplanted in those deficit areas, coming from the lawn areas that is being removed in the landscaping work of the outer ring.
