## WEEK 40 DE 2019

CONDADO DE ALHAMA GOLF RESORT

### MONTHLY PLAN (WEEK 1)

Below is the stipulated plan for this week:

<i>MONTHLY PLANNING GENERAL GARDENING WORKS - CONDADO DE ALHAMA</i>				
<i>DATE/PERIOD</i>	<i>HEDGE TRIMMING</i>	<i>GRASS LAWN</i>	<i>FITOSANITARY TREATMENT</i>	<i>OTHER GENERAL WORKS</i>
<i>WEEK 1. 1 October 6 October</i>	<i>Naranjos 5,6,7,8</i>	<i>Jardines 3,4,9 Villas Jana Internal roads External roads</i>	<i>Treatment against white cochineal on hedges of Jardines and Naranjos Treatment against caterpillar in lawn of Jardines, Naranjos, internal roads and external roads</i>	<i>Palm tree pruning on Jardines Pools maintenance Irrigation breakages Incidences</i>

Of all this, it has been missing to make the hedge cut in Naranjos 8. On the other hand the pruning of palm trees in the common areas of Gardens is in execution.

### SUMMARY

This week a phytosanitary treatment plan has been started to combat the presence of caterpillar in different lawn areas of the Resort. The results are being very effective since their presence in the treated areas has not been detected again. However, the weekly preventive review will continue and phytosanitary reinforcement treatments will be carried out if necessary. In a few days, the areas that have been affected will return to their green colour and natural state.

The hedge trimming has been carried out this week in Naranjos 6, Naranjos 7 and Naranjos 8. As this task is completed, phytosanitary treatments will be carried out against the white cochineal insect, that endemic pest of the ficus specimens that tend to reproduce in the more hidden and shaded areas of the plant. Therefore, spraying is carried out after pruning to achieve greater treatment efficiency.

## WEEK 40 DE 2019

*CONDADO DE ALHAMA GOLF RESORT*

On the other hand, due to the heavy storms that occurred 3 weeks ago, weed growth in different green areas of the different phases has been favored. This has already been detected and an action plan based on fumigation and manual removal is being established starting next week.

With respect to trees, the old and dry branches of the small and medium sized palm trees of all the community gardens will be pruned. Similarly, the lower branches of some trees (Tipuana tipu) will be pruned in the community gardens of Naranjos 6 and Naranjos 7.

As for the furniture, several beacons have been detected that need to be repaired, 5 tops of damaged wastebaskets that need replacement and a wastebasket that has lost a wooden slat in the Garden phase. Also other 3 tops of wastebaskets have been detected that need replacement in the Naranjos phase.
